Mining Items.

Three or four days later advices from Lake Superior have been received. The news in regard to the various working mines is very favorable, and a great season was expected. All the Companies were uncovering, or getting out considers ble parcels of Copper. The Cliff mine, it is stated bas more copper ancovered than can be taken out by the present force in three years. The accounts of the Adventure, Ridge, North-West, North-Western, Norwich, Douglass Houghton, &c., are very gratifying. Twoor three new locations have been explored with success

The Copper Mines in Pennsylvania are also yielding well, and several locations have yielded a large return.

The Chester County (Pa) Mining Co. are work tog a vein of Argentiferous Galena with good re sults. They have got out about three hundred tons of ore, worth, it is supposed, sixty dollars per ton. The quantity of silver in the lead increases as the vein is driven.

There is a much larger business being done in this City in Copper and other Mining Stocks than parties not within the influence of these specula. tions are aware of. The faucy mines of a few years since, which were all stock and no ore, have mostly exploded, and the projects which offer a fair show in the ground are in good favor, and dealt in to considerable extent. Most of the Lake Superior mines will either this year or next pay large dividends on the expenditures.

Industrial Exhibition.

It would seem from the foreign correspondence, and from what appears in the London newspa pers, that a collision has arisen between Mr. Rid. dle and Mr. Stansbury, as to who is to be the Representative of American interests in the Industrial Exhibitions. The real facts are these -Mr. Edward Riddle of Boston, was on the 24th day of January, 1851, appointed to arrange the American products in the Exhibition Room, and exercise a general supervision, with special reference to such products of American Citizens as should not be entrusted to particular agents.

On the 17th of February, Mr. STANSBURY WAS commissioned to proceed to New-York, superin terd the loading of the St Lawrence, to take care that no articles were admitted on board which had not been sanctioned by the Executive Committee, proceed to Southampton, superintend the careful valoading of the same, and see them carefully transported to the place of exhibition giving all unclaimed packages into the charge of Mr. RIDDLE Here the duties of Mr. STANSBURY. as one of the agents of the U. S. Committee, cease—here the duties of Mr. RIDDLE commence. The duties of each are distinctly set forth, and no necessity need exist of any collision.

The origin of the difficulty arises from the following facts, viz: Mr. Stansbury, on arriving at London, presented his commission to Mr. Lawrence. It was not read by our Minister, who not being apprised of any other appointment, took it for granted that Mr. 8 was the sole Commissioner, and as such presented him to the Queen. Mr. Riddle not having arrived, the London papers noticed the circumstance, and gave andue prominence to Mr. Stansbury, who seems not entirely to have understood the limited powers conferred upon him by the American Committee-

Scientific Convention at Cincinnati.

The following Circular has been handed us for publication by the Secretary of the American Association for the Advancement of Science, of which the next session will be held at Cincinnation the 5th of May. It is hoped there will be a large attendance, inasmuch as this is the first meeting of the Association West of the Alleghanies, and will probably be the last for some years. The interests of Science in the West and Southwest will profit by a general attendance. The arrangements for the Convention are offi-

cially announced below : AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCI.

BROOKLYN ITEMS.

LAST NIGHT IN BROOKLYN.-This evening the HUTCHINSON BROTHERS make their farewell bow to their friezds in Brooklyn. They have certainly had a serious trial of their faith in cold water during their recent visit to this and the reighboring cities. But their faith has been abundantly rewarded by good andiences, both in New. York and Brooklyn, in spite of the tempests and rain of the past formight. Their finale to night will unfountedly be well patronized and their auditors well repaid.

THE DRURY TRIAL -The trial of Samuel Drury, See, was resumed in the City Court yesterday morning. Four witnesses were examined on the part of the prosecution. The principal evidence, however, was that given by Wm. O Jenkins, formerly a policeman of the Sixth Ware. New York, which occupied the majority of the time the Court was in vession. He testified that Samuel Drury, Sen, was arrested by him in a lot on the Hights en the 18th of November, 1149, whither he had followed him under the lead of One Eyed Thompson, who was about one block in advance and in company with the priswas made, Thompson walked off, and witness, together with another officer from the same Ward, named Crassous, went up and took Drury into castedy. Previous to which be observed prisoner "fumble" in his vest pocket and let semething drop from his hand. He picked up the warf which proved to be several cank bills neatly folded. These bills are the same upon which the present indictment is Sounded, and for the possession and alleged intent to cir-culate which the prisoner is now on trial. At 33 o'clock P.M. the Court adjourned, and to day at 18 A.M. the case will be continued.

COMMON COUNCIL .- At the meeting of this body last evening, resolutions appropriating the sum of \$2,500 to the Police; and directing the Commissioner of Repairs and Supplies to repair the Bridge on the Williamsburgh Road, near Kent avenue were adopted. A resolution directing the Captain of Third District Police to nonon directing the Captain of Third District Police to no-lify the occupants of Shastles on Washington Park to re-move the same within ten days was referred to Aldermen of Eleventh Ward, and Captails of Police of that District. Resolutions authorizing a tax of \$1,200 to be raised in the Seventh Ward for the purpose of crecting lamp posts in said Ward, and for raising a tax of \$1,200 in the Eleventh Ward for gas lamp, were severally referred to the Fi-pence Committee. A politica asking for the passage of an ordinance to prohibit smoking in the public streets, was referred to the Committee of Repairs and Supplies.

Our neighbor of The Tribune, whom we have always considered good authority on weather subjects, except when he blunders, [when did we ever blunder about the weather!] announces that "the storm finally spent itself yesterday evening." [Com. Advertiser.

So it did: and for six hours there was clear starlight. But yesterday morning another storm came on, quite as disagreeable as the first. After continuing all day, this storm too, "spent itself" yesterday evening. But we are not sure that still another will not greet us waking this morning.

THE ELECTION OF SACHEMS .- Last night there was a terrible commotion in the "Old Wigwam," the occasion being the annual election of officers of the " Columbian Order, or Society of Tammany." At an early hour the carriages began to arrive at the Hall, depositing at the doors a different class of persons from those who generally compose the gatherings at that world-renowned building. Among the crowd we noticed Brownell, Conner, Childs, Seagrist, Sweet, Pardy Mickle, French, Bogardus, Cutting, Bell, beside a number of hangers on, and the usual assortment of tooth-pick girls and match boys. Each party had issued an Address to the masses, and o course their followers responded to the call in large numbers. All through the afternoon there had been a desperate war carried on by the riva factions against the old enemy of the Red man. the accursed Fire Water, and the effect of the

struggle was every where visible. -At 7 o'clock the Chief called the warriors to the Council Chamber to deliberate on the condition of the tribe, and to choose those who for the next twelve moons should preside over their deliberations. Our reporter was not a member of the Order, and therefore was not a member of present, but from some remarks which he heard around the Council Hall, he has been enabled to present the result of the ballotings, which is as follows:

Thus it will be seen that the whole Barnburne, ticket is elected with the exception of their candidate for Wiskinkie, who was caught making professions of friendship to the Hunkers, and promptly paid off for his treachery by his own party. Last year there were 190 votes polled. six Hunkers and four Barnburners elected Sachems, and there was a tie on the other three.

MICHAEL O'CONNOR, the President of the Society of the Young Friends of Ireland, died yesterday of typhus fever, at his residence at Sing Sing. He had lately been appointed a Keeper in the Prison. WALLACE To-NIGHT .- We promise an unusual treat to all who visit Tripler Hall to night. Wallace has arranged a capital programme for the performances of the evening, embracing a selection from his own compositions, which displays the different forms of his musical genius, together with songs from Mozart, and Strakosch's new opers, and Spohr's celebrated "Double Quatuor." Wallace-a hest in himself-will perform on the piano and violin. The other instrumental performers are Hoffman Griebel, Bristow and Schuberth; the vocatists Madame Wallace, Bonchelle and Mr. Arthurson. Wallace's cholof tieces is admirably made. We are only disappointed that tite " Night-Winds " does not appear; but perhaps we can get it in an encore.

MONDAY, April 21-P.M.

There was not a large activity in Stocks to day, cepting in Eric and Eric Securities Harlem and Reading. The other fancies were steady but the attention of operators was not drawn to them. Reading recovered a portion of the decline of Saturday, closing at 50; an advance of 1; † cent. The improved feeling is consequent upon a state ment that the misunderstanding between the Railroad and the Navigation Companies had been or would be arranged. We understand a meeting of the parties concerned was Railroad denies that there has been any bad faith upon the part of his Company. The Ledger says :

On Friday afternoon a leading broker, connected with the management of the Schuyikill Navigation Company, sold about 2,000 shares Reading, and early on Saturday morning followed up the operation by selling 1,500 or 2,000 shares additional. This led to some inquiry as to the cause of a movement which had every appearance of preconcert. shares additional. This led to some inquiry as to the cause of a movement which had every appearance of preconcert. The result was, that complaints were alleged against the fairness and good faith of the Railroad Compeny in the policy of their toils, to the prejudice of the Canal, and it was intimated that, as a measure of retalistion, the Canal would, if becreasiny, reduce the toils to a point that would traverse the secret and indirect drawbacks of the other Company. The charge against the Railroad is peremptorily cented by the Directors, and it is stated with equisi emphasis, that no retaliatory measure has yet been a socied by the Canal. At the first Board Reading fell of 12th 2 cent from Friday's rates, and the Bonds sold down to 75 Procent. The Loans of the Canal fell of Prent, selling at 21, interest on. The New-Yora market being in advance of this Reading was freely taken in that city, and the probability is the cash stack will soon he as scarce as it has hitherto been about dant in Philadeiphia. The relative tunnage of last weak of the Railroad and Canal has provedly given rise to all the excitement on the subject. Some of the filerals of the Canal are surprised to find that with only equal nominal advanages as to rates, the other Company are monopolizing three fourths the trade. Hence the surprised to further says the other hard, point to the immense equipment, machinery and reliability of the Road, under all changes of season, weather, & c. as the true cause of its large tunnage.

Harlem was steady at 714. Eriesold to the extent of 2,000 shares, opening at 90, going to 90% and closing at 90%. The Securities continue to improve. As we surmised some days since, the incomes and Convertibles are of about the same current value. Incomes sold at 96 and after the Board Convertibles were sold at the same price. At the second Board the latter sold at 9% showing ; p cent advance from Saturday. Norwich was firm at 542 The movement in New-Jersey Mining continues and 400 shares sold at 15, an advance of 50c P share. Government Stocks were in de-mand and show a further advance, the Sizes of 100 setting at 117. The Sound Stocks generally were rm.
